A

TRAVELLING
DICTIONARY:
OR,
ALPHABETICAL TABLES

OF THE

Distance of all the Principal CITIES, BOROUGH, MARKET, and
SEA-PORT TOWNS, in GREAT BRITAIN, from each other.

SHEWING BY INSPECTION

The Number of Miles every City or Town in the Kingdom is
Distant from any other, according to the nearest Direct or Cross Road.

COMPREHENDING

Near FORTY-SIX THOUSAND DISTANCES, carefully collected from the
best Authorities, and arranged in a Manner entirely new and plain.

TO WHICH IS ADDED,

A TABLE, shewing the Distance of the TOWNS, BRIDGES, &c.
upon the RIVER THAMES, from each other by Water.

The Whole being a SECOND PART to the
New and ACCURATE DESCRIPTION of the ROADS.

THE FOURTH EDITION CORRECTED.

By DANIEL PATERSON,

Assistant to the QUARTER-MASTER-GENERAL of His Majesty's Forces.

TRAVELLING DICTIONARY: OR ALPHABETICAL TABLES

Distance of all the principal Cities, Boroughs, Markets, and
 Sea-Port Towns, in Great Britain, from each other.

The Author of this Dictionary is
 Daniel Paterson, Esq. of the City of London.

First Published by T. Cadogan, at Number 69 in St. Paul's Church-Yard.

A TABLE, showing the Distance of the Towns, Bridges, &c.
 upon the River Thames, from each other by Water.

The Whole being a SECOND PART to the
 First and Accurate Description of the Roads.

THE FOURTH EDITION CORRECTED.

By DANIEL PATERSON.

Aligned to the Quarter-Master-General of His Majesty's Forces.

L O N D O N.

Printed by T. Cadogan, at Number 69 in St. Paul's Church-Yard.

M DCC LXXXV.

P R E F A C E

THROUGH the unwearied Industry and increasing Opulence of the Inhabitants of this Kingdom, the Roads in every Part of it are made so convenient for Travelling, that they are the Admiration of Foreigners, and the Pride of the Natives.

An easy Communication with every Part of the Kingdom being thus opened, the Traveller, accommodated with the most essential Requisites for the Performance of his Journey, has nothing left to desire but such a Pocket-Companion as might best direct him in the Way he would chuse to go. This we have in Part already supplied him with, by the *New and Accurate Description of the Roads*.

To compleat our Plan, by giving the Traveller every Assistance that he might possibly want, we have compiled with great Labour, and we trust with much Accuracy, this *Second Part*, which, although rendered so commodious, comprises near **FOURTY-SIX THOUSAND** Distances. These are digested in so simple and plain a Manner, that the Number of Miles any Place is distant from another, may be discovered with as much Ease and Expedition as two Words can be found in a common Dictionary; a Work hitherto much wanted, and only to be supplied by a tedious, and in many Instances, fruitless Search into Books and Maps, which not being portable, are of no Use, when there is most Occasion for their Assistance.

Though the Advantages of these Tables are sufficiently obvious, yet we may observe that they will be found useful to the Trader at Home, as well as the Traveller on the Road. The Trader will, on Inspection, inform himself of the intermediate Distance of any two Places, and thereby judge how to convey his Orders with the most Expedition, and least Expence. The Traveller will find the Compass he must make to visit any Place or Places which he may be desirous of taking in the Course of his Journey; and likewise will be enabled at setting out to form an Estimate of his Time and Expence, by calculating with the greatest Exactness the Number of Miles he must travel, though the Tour he proposes to make should be ever so much about or irregular. Those who have experienced how various, and often irreconcilable, have been the best Accounts they could procure of the Distance of Places on their Journey, and how vexatious in their Consequences, will readily acknowledge the Utility of a Work of this Kind.

To

iv P R E F A C E.

To find the Distance between any two Places, the following general Rule must be constantly observed:

As the Names of Places on the Top of the Page, as well as those down the Side, are disposed Alphabetically, that Place, which in Order of the Alphabet comes first, must be always looked for on the Top, and the other on the Side of the Page. Thus, to find the Distance between *Warwick* and *Leicester*, look for *Leicester* in the Top Columns, and *Warwick* in the Side; -- between *Cambridge* and *Oxford*, look for *Cambridge* on the Top, and *Oxford* on the Side; and so on in every Instance.

Let us suppose a Traveller, who being at *York*, wants to go to *Huntingdon*: *Huntingdon* coming in Alphabetical Order before *York*, he looks for that Place in the Top of the Pages, by turning them over till he comes to Letter H, where he finds *Huntingdon* between Ho -- Ke; turning then his Eye down the Pages for *York*, he will find in the Line even with *York*, and directly under *Huntingdon*, the Figures 136, which is the Number of Miles *York* is distant from *Huntingdon*. But suppose further, that he should wish to take *Lincoln* in his Way, and would know how much his Journey would be increased thereby; proceeding in the same Manner, he finds the Distance from *York* to *Lincoln* to be 72 Miles, and from *Lincoln* to *Huntingdon* 71, which added together make 143 Miles, or 7 more than the direct Road from *York* to *Huntingdon*.

As all the Towns, &c. in the different Tables are only a Repetition of those in the first; the Names of the Counties are added to that Table only, so that the County any Town is situated in may be known by referring to the first Table, where also may be seen which Place is given in the Table when there are others of the same Name; as for Instance, from *Nottingham* to *Richmond* is found to be 123 Miles; but not knowing whether it is *Richmond* in *Yorkshire*, or *Richmond* in *Surry* that is given, the first Table shows it is the former; and thus of *Atherstone* in *Warwickshire*, and *Atherstone* in *Worcestershire*; *Bromley* in *Kent*, and *Bromley* in *Staffordshire*, and several others, where only one of the Name is given in the Tables; but where two or more Places of the same Name are given, the Distinction is given with them, and carried on through the whole; as, *Newport Isle of Wight*, *Newport Monmouthshire*, *Newport Pagnel*, *Newport Pembrokehire*, &c.

N. B. The Distances from *London* to all the Cities, Boroughs, Market, and Sea-Port Towns in *England* and *Wales*, are given in the First Part of the Book of Roads; to which Recourse must be had when the Distance to or from *London* is required.
